

THE FOLLOWING IS THE ENGLISH TRANSLATION OF THE  
AMENDMENTS TO THE CLAIMS OF THE INTERNATIONAL  
APPLICATION UNDER PCT ARTICLE 19:  
Amended Sheets (pages 92-94)

- 92 -

S05P0181

main image data included in the AV stream file referred to by the main playback path and the accompanying data included in the sub files referred to by the sub playback paths;

a reading step of reading, if the accompanying data selected by processing of the selection step is included in a sub file referred to by a sub playback path, the sub file referred to by the sub playback path together with the AV stream file referred to by the main playback path; and

a playback step of playing back the main image data included in the AV stream file read by processing of the reading step and the accompanying data included in the sub file selected by processing of the selection step and read by processing of the reading step.

10. (Amended) A recording medium recording thereon association data concerning an AV stream file included in a clip and accompanying data to be played back simultaneously with playback of the AV stream file,

wherein the association data indicates whether the accompanying data is included in a clip used by a main playback path indicating a position of the AV stream file or in clips used by a plurality of sub playback paths indicating positions of sub files including the accompanying data played back simultaneously with playback of the AV stream file,

and, if the association data indicates that the

accompanying data is included in the clips used by the plurality of sub playback paths indicating the positions of the sub files including the accompanying data, the association data includes at least an ID of the sub playback path to be played back selected from

the ID for specifying the sub playback path to be played back,

an ID for specifying a clip used by the sub playback path, and

an ID for specifying an elementary stream to be played back by the clip.

11. (Amended) A recording medium recording thereon data including a playback control file having a main playback path indicating a position of an AV stream file included in a clip,

wherein the playback control file includes a sub playback path indicating a position of a sub file including accompanying data to be played back simultaneously with playback of main image data included in the AV stream file,

the main playback path includes a table defining a list of elementary streams that are selectable while the main playback path is being played back, and

the table includes data indicating whether the selectable elementary streams are included in the AV stream file selected by the main playback path or the sub file

selected by the sub playback path.

12. (Amended) A data structure including a playback control file having a main playback path indicating a position of an AV stream file included in a clip,

wherein the playback control file includes a sub playback path indicating a position of a sub file including accompanying data to be played back simultaneously with playback of main image data included in the AV stream file,

the main playback path includes a table defining a list of elementary streams that are selectable while the main playback path is being played back, and

the table includes data indicating whether the selectable elementary streams are included in the AV stream file selected by the main playback path or the sub file selected by the sub playback path.
